Human Kinetics Publishers, United States, 2009. Paperback. Condition: New. 4th edition. Language: English . Brand New Book. The fourth edition of *Developing Clinical Proficiency in Athletic Training: A Modular Approach* takes the skills that athletic training students need and organizes them into a modular system that will help students progressively develop while providing instructors with a systematic means of assessing their students learning. The manual presents a flexible system consisting of three levels that are broken down into 146 modules used for assessing students clinical skill development over the course of their athletic training program. The text is presented in such a way that it allows instructors to adjust the order of presentation of the modules while maintaining a complete record of the competencies achieved. Previously titled *Assessing Clinical Proficiencies in Athletic Training*, this latest edition guides students and clinical instructors through the maze of educational competencies required of entry-level athletic trainers. All of the current National Athletic Trainers Association (NATA) Athletic Training Competencies are embedded in the text. Because it covers all the competencies, this workbook can be used in conjunction with any athletic training text. The NATA competencies are noted in each module and are cross-referenced in an appendix. The following are new features of the fourth edition: -Coauthor Dr. Kirk Brumels joins author Ken Knight as a veteran clinic educator and a longtime user of the modular system. -The 26 new modules enhance the existing modules and improve the coverage of competencies from the previous edition. -Three new groups of modules are included: Developing Clinical Skill, The Body, and Professional Development. -A new module, Foundational Behaviors of Professional Practice, has been added to all three levels to ensure that students and clinical instructors have an ongoing dialogue concerning these behaviors. In the fourth edition of *Developing Clinical...*
