Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Juliet Mertz)

PROCEEDINGS OF THE THIRD JAPAN-USSR SYMPOSIUM ON PROBABILITY THEORY

Springer Nov 1976, 1976. Taschenbuch. Book Condition: Neu. 235x155x39 mm. This item is printed on demand - Print on Demand Titel. Neuware - Some limit theorems for a queueing system with absolute priority in heavy traffic.- On certain problems of uniform distribution of real sequences.- Norms of Gaussian sample functions.- On a new approach to Markov processes.- Limit theorems for linear combinations of order statistics.- Some estimates of the rate of convergence in multidimensional limit theorems for homogeneous Markov processes.- Expectation semigroup of a cascade process and a limit theorem.- Potential theory of symmetric markov processes and its applications.- Hilbert space methods in classical problems of mathematical statistics.- On the martingale approach to statistical problems for stochastic processes with boundary conditions.- Probabilities of the first exit for continuous processes with independent increments on a markov chain.- Noncommutative analogues of the Cramér-Rao inequality in the quantum measurement theory.- Test of hypotheses for distributions with monotone likelihood ratio: case of vector valued parameter.- Criteria of absolute continuity of measures corresponding to multivariate point processes.- Normal numbers and ergodic theory.- On multitype branching processes with immigration.- Statistics of stochastic processes with jumps.- Evolution asymptotique des temps d'arrêt et des temps de séjour liés aux trajectoires de certaines fonctions aléatoires gaussiennes.- Asymptotic enlarging of semi-markov processes with an arbitrary state space.- The method of accompanying infinitely divisible distributions.- Optimal stopping of controlled diffusion process.- Additive arithmetic functions and Brownian motion.- Asymptotic behavior of the fisher information contained in additive statistics.- Nonlinear functionals of gaussian stationary processes and their applications.- Stationary matrices of probabilities for stochastic supermatrix.- An estimate of the remainder term in the multidimensional central limit theorem.- A remark on the non-linear Dirichlet problem of branching markov processes.- Some remarks on stochastic optimal controls.- On stationary linear processes with Markovian property.- Some limit...
