## OPTIMAL PROPORTIONAL REINSURANCE POLICIES FOR LEVY MARKETS WITH COSTS

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | On The Optimality Of Reinsurance In Quantitative Risk Management | From the point of view of the first insurer, we determine the ideal proportion of an insurance policy, in a Levy market, to be re insured and the expected value attained using Stochastic control (Dynamic programming). A Levy process is used to model the reserves of the insurer given that a re insurance policy has been implemented as a means of risk transfer. For completeness, the results are analytically and graphically compared with those of a diffusion model with the aid of Matlab. Financial mathematicians, actuaries, and insurers would find this book useful. A background in stochastic differential equations will make understanding easier. | Format: Paperback | Language/Sprache: english | 107 gr | 64 pp.
