

Studies from the Laboratory of Physiological Chemistry Volume 3

Filesize: 2 MB

Reviews

*Extensive guideline! Its such a great go through. It is definitely basic but surprises in the 50 % of the pdf. It is extremely difficult to leave it before concluding, once you begin to read the book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: .this protocaseose differs somewhat from the protocaseoses previously obtained, and as the characters of the present body have been verified by the reactions of several other products similarly produced, we are led to believe in their constancy. Moistened with water, the powdered protocaseose becomes immediately gummy and soon dissolves to a perfectly clear fluid, which on addition of considerable water becomes decidedly cloudy or turbid. Treated with a large amount of water at the outset, the protocaseose dissolves more slowly, giving a more or less turbid fluid. In dilute acid and in dilute sodium carbonate it dissolves to a perfectly clear fluid. Towards heat, aqueous solutions of protocaseose act exactly like protoelastose. Even when warmed very gently, the solution becomes quickly turbid and if concentrated gives more or less of a flocculent precipitate. On cooling, the turbidity disappears, reappearing as the fluid is heated. Like protoelastose also, a solution of the caseose body on being rapidly concentrated deposits more or less of the substance as a gummy mass, which, however, will dissolve in cold water, or if the fluid is not too concentrated will dissolve in the mother liquid as it cools. Dilute acetic acid added to an aqueous solution of protocaseose gives no precipitate whatever, but potassium ferrocyanide added to the acid: fluid gives a heavy precipitate. Dilute hydrochloric acid produces no precipitate. Dilute nitric acid added to an aqueous solution of the caseose gives a heavy white precipitate, which on gently warming, quickly dissolves...
